WEATHER SYNOPSIS BY REGION

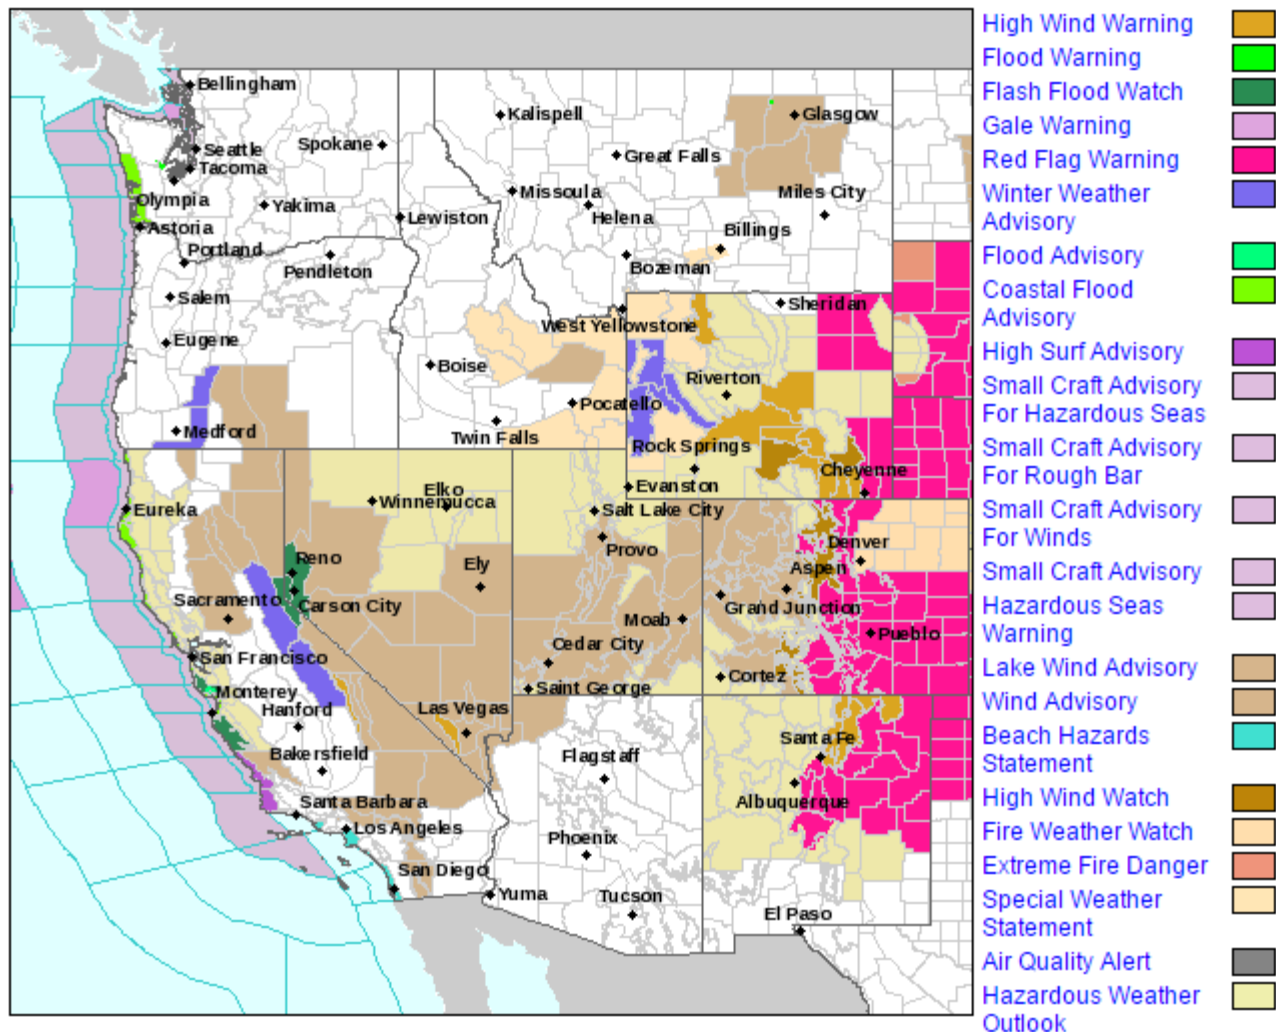

NORTHERN CALIFORNIA

Periods of Heavy Precipitation and Strong Gusty Winds Through Early Monday, Followed by Scattered Showers Until Early Tuesday
The wet unsettled weather will continue throughout Northern California until early Tuesday. The next front is moving into Northwest California this morning with strong gusty SE to SW winds and moderate to heavy rain. Isolated thunderstorms are possible. Snow levels are dropping to 5000-6000 feet as the front passes. The front will reach the southeast the Tahoe area late this evening. Peak gusts will be 30-40 mph in many areas today, and wind-prone areas like Weed could possibly see 50 mph or higher. From midday Monday through early Tuesday only scattered showers and isolated thunderstorms are expected in northern and eastern areas. A warming and drying trend will begin late Tuesday as high pressure builds over Northern California from the eastern Pacific. A N-NE/offshore surface wind pattern will enhance the warming and drying trend from the western Sierra slopes to the coast Tuesday night through Friday morning, with peak gusts reaching 20-30 mph in wind-prone areas Wednesday and Thursday mornings. However, the drying effects from this wind event will not be sufficient to dry fuels out enough to elevate fire potential much, even in the lower elevations in the south. Temperatures will warm to about 5 degrees above normal west of the crest late in the week.

SOUTHERN CALIFORNIA

Windy, hot, and very dry across Southern California Wednesday and Thursday
A storm off the Pacific Northwest Coast will bring showers mainly from a Monterey/Fresno County line northward this morning. Showers will move south this afternoon and make it into Southern California tonight. Most of the shower activity will end by late Monday morning. There will be up to 2 additional inches of rainfall across the Central Sierra and its surrounding foothills as well as the mountains of Monterey County. Elsewhere, expect an additional quarter inch to half inch across Central California and less than a tenth of an inch across Southern California. Southwest to west winds of 20 to 40 mph with gusts to 60 mph will continue to surface across the mountain ridges and desert passes through Monday afternoon. Maximum temperatures will be 5 to 10 degrees below normal through Monday, with 50s to low 60s across the mountains and mid 60s to mid 70s in the valleys. Significant warming along with very low humidity will take place Tuesday through the end of this week as a strong ridge of high pressure approaches the California Coast and moves inland. Temperatures will warm to near normal Tuesday and then warm to 5 to 15 degrees above normal Wednesday through the end of this week. Minimum humidity will drop to 12% to 25% Tuesday and then there will be widespread single digit humidity Wednesday through Friday. North winds of 20 to 30 mph with gusts to 50 mph will surface across the South Coast of Santa Barbara and the Grapevine Monday night through Tuesday night. These winds will become northeast to east and surface across the mountains and below the canyons and passes of Southern California Wednesday morning through Thursday morning. The offshore winds across Southern California will decrease Thursday afternoon and become light by Friday morning.

CAL OES LAW ENFORCEMENT MISSIONS

New Cal OES Law Missions

- **2016-LAW-27452, 10/15/16, 1038 hours,** The Mono County Sheriff's Office (MCSO) is requesting a mutual aid dive team to assist in the search for 3 subjects involved in a vessel accident on June Lake. The vessel, with 5 passengers aboard overturned approx. **10/15/16 at 0915 hours,** MCSO was first notified at 1015 hours. Two of the passengers swam to shore on their own power and three are outstanding (ages 14, 24, and 42). San Bernardino Sheriff's Office was contacted and agreed to support the request. The search will take place today, 10/16/16 with the teams meeting at the June Lake Marina at 0800 hours for a briefing. **Mission Ongoing.**
- **2016-LAW-27463, 10/15/16, 2033 hours,** Air Force Rescue Coordination Center (AFRCC) reported an Alert Notification (ALNOT) (missing/overdue aircraft) on a red and white single engine Cessna 182D, Tail Number N8718X. The aircraft, with only the pilot listed aboard, was enroute to the Westover Field in Jackson, Amador County, with an unknown arrival time. Radar track records showed the aircraft disappearing from radar at 1553 hours (Sat) at coordinates: 38.9264N, 120.2242W, which plots to the Red Peak Area of El Dorado County, approx. 8 miles west of Fallen Leaf Lake. AFRCC confirmed ramp checks had been completed and coordinated with the local agency (Amador). The CSWC sent a California Law Enforcement Telecommunications System (CLETS) message to both El Dorado and Amador counties based on new information that the departure location was somewhere near Boise Idaho. AFRCC was working to activate the California Wing (CAWG) of Civil Air Patrol (CAP) and conduct cell phone forensics. LDO confirmed with El Dorado SO (EDSO) their reception of the CLETS message and to update them with the coordinates and departure airport information. They were alerting their Search and Rescue (SAR) team out of Tahoe. CAP called LDO at 0018 hours advising they had been activated and were beginning an analysis of the radar tracks. 0230 hours, CAP advised the analysis revealed the aircraft rapidly descending just north of Lake Schmidell at/near the 9K' level. LDO coordinated a joint conference call with CAP and EDSO at 0400 hours CAP will attempt to launch their aircraft at 0700 hours out of Fresno and EDSO will begin activating their SAR team and coordinate with CHP to utilize their helicopter to assist. The CSWC was briefed and Cal EOC updated. At 0611 hours, EDSO advised weather may be an issue for both the CAP and CHP aircraft and may be placing a request for air support out of Naval Air Station (NAS) Fallon. **Mission Ongoing.**

Closed Cal OES Law Missions

- **2016-LAW-27430, 10/14/16, 1840 hours,** International Emergency Response Coordination Center (IERCC) reported a Delorme inReach device activation at coordinates: 36° 10' 39"N, 118° 22' 21"W, which plots along the Kern River in Tulare County. The Registered Owner (R/O) activated it on behalf of another subject (a 45 year old male) who had fallen in the water and suffered what is believed to be a dislocated shoulder. LDO immediately briefed Tulare Sheriff's Office (SO) who attempted to dispatch an ambulance, but it was determined there was no vehicle access. Due to darkness, Tulare SO secured CHP H-40 assistance for first light this morning. IERCC was able to communicate this information to the R/O who advised they had provisions for overnight and would shelter in place. **Update: 10/15/16, 0654 hours,** Tulare SO advised that CHP H-40 is enroute. IERCC notified and requested to message the R/O. **UPDATE: 10/15/16, 0926 hours,** Tulare SO advised that CHP has completed the rescue/extraction and is enroute to Kern Medical Center. IERCC advised. **MISSION CLOSED.**
